

REACTIVATION AND SARS-CoV-2 MITIGATION PLAN

Updated: 8-Mar-22

INTRODUCTION

The purpose of this plan is to demonstrate the steps that will be taken to reactivate the Greater Columbus Convention Center and operate events during a pandemic.

The goal is to demonstrate to employees, clients, attendees and stakeholders that hosting and attending live events can be accomplished responsibly.

To achieve the goal of a smooth and safe reactivation of the GCCC, this plan and the VenueShield program are divided into six sections: Pro-Tip: Click on any section below to go directly to that section in the document.

TABLE OF CONTENTS

ENVIRONMENTAL HYGIENE)
Cleaning the facility to the highest standards	
FOOD SERVICE	3
Providing responsible and enjoyable culinary experiences	
CUSTOMER JOURNEY	7

Tailoring each event to minimize risk and maximize attendee engagement

Safely returning our workforce to the venue to serve our customers

TECHNOLOGY & EQUIPMENT .. 67

Exploring the new role for technology and equipment

PUBLIC AWARENESS

Communicating the new ways in which we will be conducting business

RESOURCES & REGULATIONS

GCCC is currently permitted to a wide range of events with specific COVID plans and safeguards in place. Please use the links below to access the most up to date COVID-19 information:

World Health Organization https://www.who.int/emergencies/diseases/novel-coronavirus-2019

United States Centers for Disease Control and Prevention https://www.cdc.gov/coronavirus/2019-ncov/index.html

State of Ohio https://coronavirus.ohio.gov/wps/portal/gov/covid-19/home

Franklin County https://covid-19.myfcph.org/

City of Columbus https://covid-19-response-columbus.hub.arcgis.com/

ASM Global https://asmglobal.com/p/our-solutions/security-services/venue-shield

Greater Columbus Convention Center This document, plus GCCC's Event Planning Guide <u>https://www.paperturn-view.com/us/gccc/greater-columbus-convention-center-event-</u> planning-guide?pid=NTI52920&v=18.2

Pro-Tip: You can download a PDF copy of the GCCC Event Planning Guide by clicking on the PDF button at the top (middle) area of the web page above.

UPDATED GUIDANCE & POLICIES

Capacity Restrictions

There are currently no event or capacity restrictions from the Federal, State or Local levels at this time and all events can move forward as planned.

Face Coverings

The City of Columbus repealed its face covering requirement on March 7, 2022. Face coverings are still strongly recommended for individuals that are not fully vaccinated. Proof of vaccination is not required by GCCC, but may be required by certain Events. Events and businesses within GCCC may also elect to require face coverings in their leased spaces and those decisions will be fully supported by GCCC staff, contractors and service providers.

Physical Distancing

There are no physical distancing requirements for events held at the GCCC, but many events are voluntarily providing 3 foot distancing in the short term to mitigate possible COVID-19 infections. Please discuss your event's physical distancing requirements (or decision not to distance) with your Event Manager.

Event Health and Safety Operations Plans

GCCC event health and safety operations plans will continue to be required to be completed by event customers moving forward on a TBD basis.

Recent Health and Safety Improvements

GCCC has been making significant improvements to the venue to improve safety and make the transition back to events as smooth as possible for clients, attendees, and guests. Upgrades completed include:

 Escalator Hand Rail Sterilizers (UV-C lights) on all 21 escalators in the facility to provide real-time hand rail sterilization

 Elevator Cab Air Sanitizers on all 16 elevators inside the facility to provide continuous HEPA (air) filtration

REACTIVATION

 24 Walkthrough Temperature and Metal Detectors to position at facility entrances and/or event entrances as needed

 25 Portable and Adjustable HEPA Air Filtering Machines to provide air filtering inside meeting rooms and ballrooms

REACTIVATION

 150 Purell® Hand Sanitizer Stations located throughout the convention center to provide CDC recommended hand hygiene at events

 MERV-14 (Medical Grade) HVAC Filters in each air handler throughout the venue

GCCC is very appreciative to the City of Columbus and Franklin County for their unwavering support and for granting GCCC the funding to make these safety improvements that will continue to improve health and safety throughout the customer journey even after the pandemic has run its course.

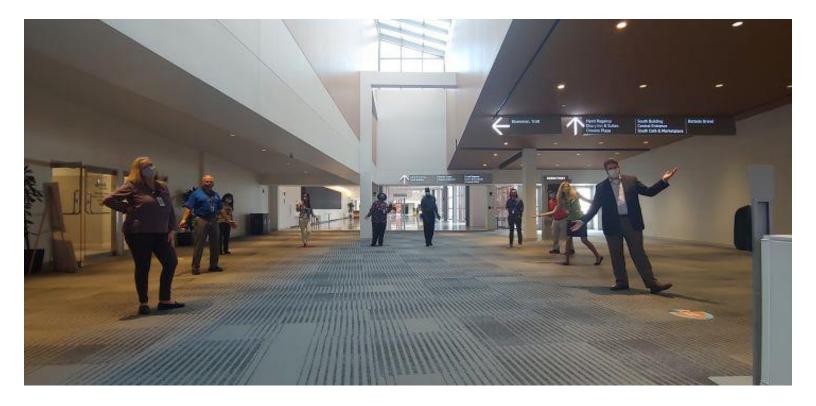

REACTIVATION

The ASM Global team at the Greater Columbus Convention Center is very excited to welcome events back to the GCCC! We are more than ready for the responsible return to business and we look forward to welcoming clients, attendees, and the public inperson during your next visit. Please review the following pages if you are interested in all of the health and safety enhancements that GCCC has completed in the past year to improve the in-person guest experience.

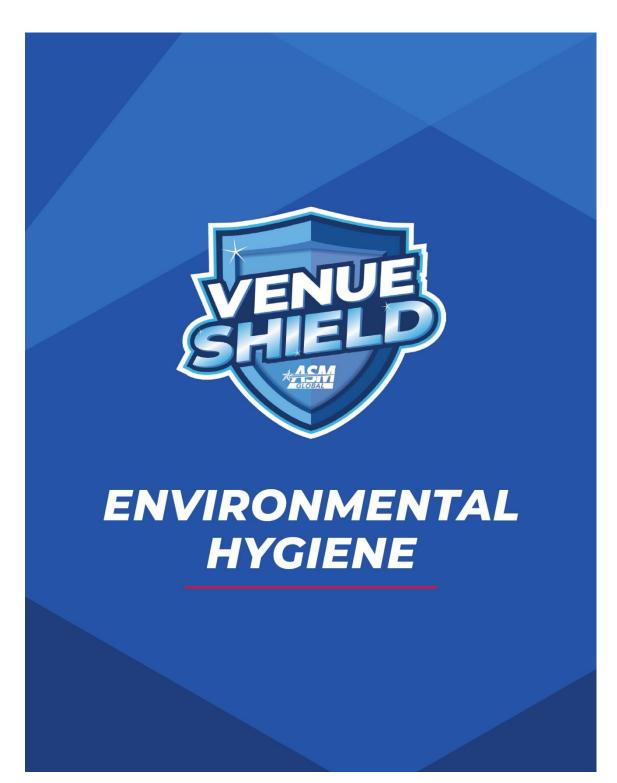

ENVIRONMENTAL HYGIENE

ENVIRONMENTAL HYGIENE

ENVIRONMENTAL HYGIENE

VenueShield ®

Greater Columbus Convention Center is managed by ASM Global who manages all aspects of the facility's operation.

ASM Global established venue cleaning protocols called VenueShield[™], which is available to convention centers, stadiums, arenas, theaters, and other special event spaces worldwide.

 Additionally, Columbus is one of the first destinations in the United States to agree to independent, third-party verification of its cleaning protocols from Global Biorisk Advisory Council (GBAC).

Nothing is more important than to demonstrate a clean and safe facility in which to do business. In order to achieve that trust, the following steps must be taken:

- Properly clean the facility and be prepared to host events at the Greater Columbus Convention Center
- Properly maintain the clean facility by adopting new protocols with enhanced frequency of cleaning using the latest chemicals to kill viruses

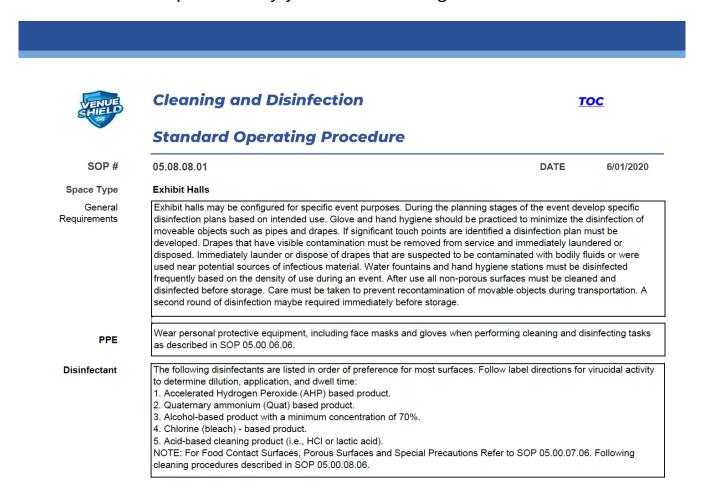

VenueShield ®

The VenueShield[™] program was created by a cross-functional team of subject matter experts with infectious disease and venue specific experience. The collaborative team took the CDC guidelines and expanded upon them to establish the best possible SARS-CoV-2 mitigation program for venues and events.

The VenueShield[™] program is divided into six sections and the applicable sections will be referenced throughout this document. **The VenueShield Environmental Hygiene section is the largest and most detailed section of the program at 265 pages and provides explicit instructions for venue staff to follow to clean and disinfect various surface types.** The various surface types detailed in the VenueShield Environmental Hygiene section are specific to ASM Global managed convention centers, stadiums, arenas and performing arts centers. A brief excerpt of the Environmental Hygiene document is below and additional information can be provided by your Event Manager.

Components Materials	Procedures and Considerations				
Vinyl Laminate					
Marble	 Marble is a naturally porous mineral and require frequents care to verify it does not become etched or damaged in a manner that will harbor dirt and potentially infectious materials. Clean debris from surface Wet wipe with a soft cloth or mop surfaces; avoid corrosive based cleaners Allow to air dry 				
Ceramic Tile, Vinyl, Linoleum					
Carpet	As of this writing, SARS-CoV-2 survivability has not been tested on carpet nor has it been observed to be a significant route of exposure, unless gross contamination has taken place. Carpet that has been isolated for a minimum of 72 hours is not expected to act as a source of infection. In the event cleaning and disinfection is deemed necessary due to a specific event or encounter, the following steps should be taken: • Spot clean areas of gross decontamination with approved disinfecting product for the upholstery type. • Steam clean with the concurrent application of disinfectant. Steam disinfecting does not generate enough heat at all application areas to be an effective disinfectant on its own. • Carpets must be completely dried as quickly as possible after treatment. Do not allow individuals to walk on carpet until completely dried: at least 4-6 hours. The process of steam disinfecting aerosolizes materials previously trapped in carpets, potentially including viruses. While these aerosolized materials remain in the air, individuals may be able to breathe them in. Consequently, workers must use respiratory protection.	Once a day			
Concrete Unsealed	Disinfect the unsealed concrete by: • Wet wiping with detergent solution, then decontamination solution, or • Low pressure spraying of detergent solution, then decontamination solution; Apply the solution so as to wet the concrete surface and all concrete gaps, fissures, grooves, and holes. Remove all visible debris and soilage through the washing event. Allow the concrete to dry completely. Conduct a risk assessment for low pressure spraying operations, increased respiratory protection maybe required if the area is assumed to be heavily contaminated.	Once a day			
Concrete Painted	Painted concrete surfaces are addressed as painted surfaces, except that painted concrete is a special circumstance because of the porosity and small cavities present on the concrete surfaces. Painted concrete surfaces often have cracks, fissures, and small circular cavities. These defects should be repaired or sealed to verify they are not harboring dirt and potentially infectious materials. These areas can be very difficult to disinfect and should be specifically monitored for dirt and debris build up until they are repaired. Clear the sealed concrete by: • Wet wiping with detergent solution, then decontamination solution, or • Low pressure misting device of detergent solution, then decontamination solution; Allow to air dry completely.	Once a day			
Walls	Walls that need cleaning and disinfection are walls that can be easily touched. More frequently touched wall will require more frequent disinfection.	Once a week			
Metal - Sealed • Mist the area with the disinfection solution. • Sequentially wash the surface with detergent disinfecting solution. • Wash (swab or wet wipe) any newly exposed surfaces with disinfecting solution. • Air dry		Once a week

DEEP CLEANING PROGRAM

CLEANING PROGRAM HIGHLIGHTS

GCCC uses a two-step process to prepare spaces for occupancy

- Step 1: Removes dirt and organic material
- Step 2: Applies EPA-approved disinfecting
 products to destroy emerging viralpathogens

Custodial staff trained in latest disinfection techniques.

Validate cleaning process by regularly inspecting areas and processes. Observe and coach staff.

Communication guidance and tools to reassure returning employees and customers about building cleanliness.

GCCC uses Non-Acid Disinfectant Bathroom Cleaner (NABC) throughout the facility to disinfect surfaces. The NABC **EPA Registration Number is 5741-18**.

GCCC intends to continue using NABC but may change EPA Registered products in the future if NABC is not available in the marketplace.

DEEP CLEANING PROGRAM

GCCC Uses EPA Registered Products to disinfect the facility surfaces.

Link to EPA List N:

https://www.epa.gov/pesticide-registration/list-n-disinfectantsuse-against-sars-cov-2-covid-19

List N: Products with Emerging Viral Pathogens AND Human Coronavirus claims for use against SARS-CoV-2

EPA Registration ⇔ Number	Active Ingredient(s)	Product 👌	To kill SARS-CoV-2 (COVID-19), follow disinfection directions for the following virus(es)	Contact Time (in minutes)
● 5741-28	Sodium hypochlorite	Tulmult	Feline calicivirus; Norovirus	0.5 (30 seconds)
Company Spart	an Chemical Company I	nc		
Formulation Ty	pe Ready-to-use			
Surface Types H	ard Nonporous (HN); Fo	ood Contact Post-R	inse Required (FCR)	
Use Sites Healt	hcare; Institutional; Res	idential		
Emerging Viral F	Pathogen Claim? Yes			
Date Added to L	ist N 04/16/2020			

Sustain a clean environment for returning employees and occupants.

Updated procedures, staff training, and additional disinfectant products to address the cleaning challenges and expectations of today's COVID-19 era. Enhancements include products with shorter dwell times, increased cleaning frequencies, and upgraded cleaning validation and quality control techniques.

- Daily cleaning to remove dirt and organic material
- Properly disinfect areas with NABC (1 step cleaner/disinfectant/deodorizer with a 30 second contact time) for high touch areas
- Realigning workflows of existing manpower; adding resources for additional high touch cleaning frequency
- Enhanced communication tools targeted to colleagues and building occupants for awareness
- Increased supervision and coaching

HIGH-TOUCH

SURFACES

INSTILL TRUST

STAFFING & EMPLOYEE SAFETY

INDOOR AIR QUALITY & MECHANICAL SYSTEMS

Two-step process that first removes dirt and bioburden, and then applies an EPA List N disinfecting product such as NABC One-Step Disinfectant Cleaner and Deodorant

Emphasis on high-touch surfaces using product with a 30-second kill time.

VALIDATION

Checklists, inspections and close supervision will ensure accountability.

FREQUENCY

Increased frequency of cleaning activity is visual cue to generate and maintain guest trust.

HAND HYGIENE

Hand sanitizers help eliminate illness-causing germs on hands.

HOSPITAL GRADE CLEANING PRODUCTS

NABC® Non-Acid Disinfectant Cleaner

PRODUCT DESCRIPTION:

NABC is a ready-to-use, non-acid disinfectant bathroom cleaner. Developed in response to requests for an easy-to-use, generalpurpose disinfectant for daily use in maintenance programs and for those who prefer a product without acid, NABC offers these benefits:

VERSATILE AND EFFECTIVE DISINFECTANT/CLEANER/DEODORIZER:

The NABC formula contains 4 powerful quaternaries, detergents, and a solvent. A proven one-step cleaner disinfectant, NABC is an excellent disinfectant cleaner for use on all hard, nonporous surfaces. EPA Reg. No. 5741-18. EPA Est. No. 5741-OH-1. More versatile than most acid-base products, NABC is strong enough to kill bacteria on the inside of toilet bowls and urinals, yet mild enough to use on a daily basis on most other bathroom surfaces, such as the outside of commodes, on ceramic tile, partitions, counters, door knobs, and walls. NABC is effective against Antibiotic-Resistant Bacteria...eliminating Methicillin resistant Staphylococcus aureus

(MRSA) and Vancomycin resistant Enterococcus faecalis (VRE). The

product is Staphylocidal, Pseudomonicidal and Salmonellacidal, while eliminating dangerous germs commonly found in restrooms. Virucidal, NABC destroys the pathogenic viruses HIV-1 (AIDS Virus), Herpes simplex Type 2 and Influenza A2/Hong Kong on hard inanimate nonporous surfaces.

SAFE:

NABC contains no acids, caustic chemicals, or abrasives and will not etch porcelain or pit restroom fixtures. NABC will not adversely affect plastic (PVC), metal, or lead pipe plumbing. NABC has a neutral pH. Accidental spills on carpeting, wallboard splashes, or clothing are easily wiped or rinsed away. Easier to use than acid-type products, NABC does not produce dangerous fumes when used according to directions.

Clorox 360 Electrostatic Sprayers

The GCCC has six (6) Clorox 360 electrostatic sprayers to disinfect large areas pre and post event.

PROFESSIONAL PRODUCTS COMPANY

ENVIRONMENTAL HYGIENE

KAIVAC[®] No-Touch Restroom Cleaning

Enhanced Cleaning Intervals for Restrooms:

- Monitoring & Full Cleaning during Operating Hours
- KAIVAC with Hospital Grade Disinfectant Daily and mid-day for high traffic restrooms

ONLINE DEMO AT: https://youtu.be/SV1XXeKVOeU

PERSONAL PROTECTIVE EQUIPMENT (PPE) FOR STAFF

- Non-medical grade
- Following two masks per person minimum
- One wearing, one ready to use
- Additional disposable masks also available in work areas as needed

CLOTH MASK BENEFITS

- Cloth masks are reusable and launderable
- Home launder up to 75 washes
- · 3-Layer fabric mask with elastic ear loop
- · Implemented as an extension of employee uniform program
- · Does not compete with medical grade masks dedicated to healthcare professionals
- Helps prevent touching nose and mouth when worn properly

HIGH TRAFFIC/TOUCH AREAS

GCCC instituted a wipeable coaster in the South Café & Marketplace to communicate whether a table is clean or in need of attention

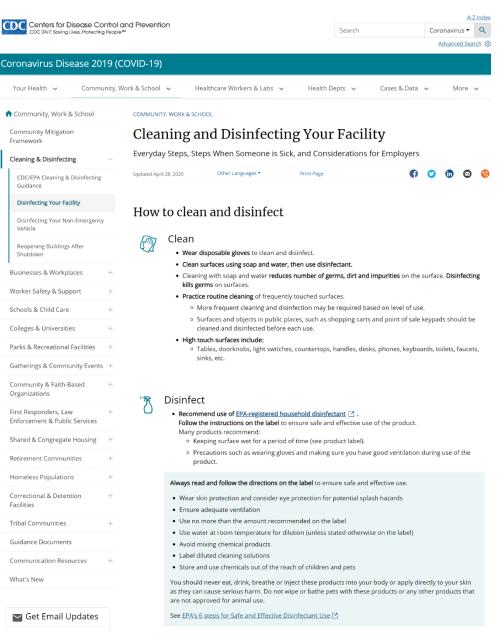

GCCC TEAM TRAINING & SAFETY

GCCC is committed to creating a safe and clean environment for our team members and guests by deploying enhanced staff training and safety. All team members will be trained on:

- What is COVID-19 and how it will change our operation
 - New Product & Cart Setup
 - High Touch Surface Schedules
 - Cleaning vs. Sanitation
- Safety Training and Visual Aids
 - Respiratory Hygiene
 - Physical Distancing
 - PPE
- KAIVAC Restroom Cleaning

https://www.cdc.gov/coronavirus/2019-ncov/community/disinfecting-building-facility.html

6 Steps for Safe & Effective Disinfectant Use

Step 1: Check that your product is EPA-approved

Find the EPA registration number on the product. Then, check to see if it is on EPA's list of approved disinfectants at: *epa.gov/listn*

Step 2: Read the directions

Follow the product's directions. Check "use sites" and "surface types" to see where you can use the product. Read the "precautionary statements."

Step 3: Pre-clean the surface

Make sure to wash the surface with soap and water if the directions mention pre-cleaning or if the surface is visibly dirty.

Step 4: Follow the contact time

You can find the contact time in the directions. The surface should remain wet the whole time to ensure the product is effective.

Step 5: Wear gloves and wash your hands

For disposable gloves, discard them after each cleaning. For reusable gloves, dedicate a pair to disinfecting COVID-19. Wash your hands after removing the gloves.

Step 6: Lock it up Keep lids tightly closed and store out of reach of children.

ENVIRONMENTAL HYGIENE

BUILDING SYSTEMS & HVAC

Greater Columbus Convention Center building engineers continue to maintain and verify the operation of the facility's mechanical systems. GCCC's Indoor Air Quality (IAQ) improvements include:

 GCCC has upgraded to a minimum of MERV-14 (Medical Grade) air filters in every single air handler. MERV-14 HVAC filters stop 99.9% of viruses.

Hyperchlorination and flushing of domestic water systems occurred prior to reoccupancy.

GCCC IS A GBAC STAR ACCREDITED FACILITY

GCCC recertified its GBAC Star accreditation in January 2022. More information about the GBAC Star accreditation program can be found on the following pages.

ENVIRONMENTAL HYGIENE

THIRD-PARTY VERIFICATION FOR CLEANING PROTOCOLS

- Greater Columbus Convention Center was among the first convention centers in the country to agree to become a GBAC Star Facility
- GBAC is an independent third-party verification system to make sure that Greater Columbus Convention Center's cleaning protocols meet the highest standards

Prepare Respond Recover

Assisting facilities, institutions, companies and governments Prepare, Respond & Recover

GBAC helps create safe environments for public health

ISSA is the worldwide cleaning industry trade association. As a global nonprofit, we have 9,300 member companies spread across 105 countries

GBAC, a division of ISSA (GLOBAL BIORISK ADVISORY COUNCIL) is staffed with subject matter experts with experience in academia such as Harvard, Penn State, Emory University, and USA Governmental Agencies. **GBAC was created specifically to deal with pandemics such as we are experiencing today** with absolute effectiveness and integrity.

How does GBAC help organizations respond and recover from the current and future crisis?

GBAC Star provides confidence, trust, and thirdparty validation that facilities are safe!

GLOBAL BIORISK ADVISORY COUNCIL

GBAC STAR FACILITY

C

GBAC STAR – What does it mean to the Greater Columbus Convention Center?

C

GLOBAL BIORISK ADVISORY COUNCIL A Division of ISSA GBAC STAR FACILITY

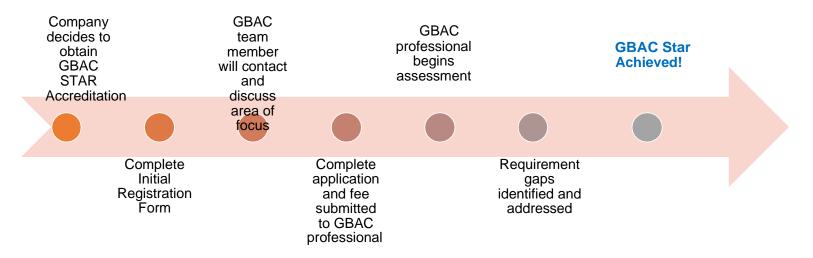

How Greater Columbus Convention Center received a GBAC Star:

GBAC STARTM program is a performance-based program. GBAC will assist with a suite of opportunities to help facilities and service providers in developing the competencies, procedures and tools to meet the requirements of the standard. Learning together, making the world a better place.

GBAC strongly believes that we all have a responsibility to have at least one subject matter expert inside each facility. All GBAC Star Facility Designations will involve:

- One GBAC Fundamentals Online Course Completion.
- This course teaches cleaning professionals to prepare for, respond to and recover from biohazards in the workplace. Participants will learn infection and contamination control measures for infectious disease outbreak situations such as the novel coronavirus (SARS- CoV-2).
- Individuals who successfully complete the course within 30 days will receive a Certificate of Completion from the Global Biorisk Advisory Council (GBAC), a division of ISSA.
- GBAC trains workers to be Microbial Warriors[™], arming cleaning professionals with the planning, knowledge and processes needed to respond to a biohazard crisis in the work- place.

More info about GBAC → <u>https://gbac.issa.com/</u>

FOOD SERVICE

PLANNING

DETERMINING THE CATERING SELECTIONS FOR EVENT FUNCTIONS WILL REQUIRE A MORE ADAPTABLE PLANNING APPROACH BOTH FROM our Team and yours

In order to prepare for the evolving nature of how catering events may be handled in the future, we have provided some example strategies & scenarios to give you the reassurance that our team is prepared

PROACTIVE

Deadlines for planning details may need to be adjusted from the standardized catering sales timeline

Heightened awareness may be necessary with projected guest attendances

TRANSPARENT

Outlining the catering budget earlier in the planning process is more important than ever, in order for planning alignment to be on target

Communication is key from all parties involved. It is important to us, that we walk you through every newly implemented planning & event execution element.

FLEXIBLE

What works for one group, may not work for another. For this reason, we will prepare custom menus that are tailored to meet your function needs

Wait times in lines may be increased. Strategies on how to schedule and stagger meal service times for larger groups with limited service time, should be discussed.

DETAIL

Knowing the full scope of the event is critical to the success of detailing the food and beverage functions appropriately.

Items such as historical insight, guest demographics, room diagrams, and agenda timelines are instrumental in the planning process.

EXPERIENCE

QUICK-GUIDE RELATED TO THE EVOLVING GUEST EXPERIENCE INITIATIVES

WITH SIMPLISTIC ELEMENTS & CREATIVITY, WE WILL CONTINUOUSLY DEVELOP NEW WAYS TO TAKE A VERY "STERILE SITUATION" AND CREATE AN ENVIRONMENT THAT MAKES GUESTS FEEL SAFE AND COMFORTABLE WHILE BEING INVITING AND FUN

STRATEGIC DIAGRAMMING FOR GUEST SERVICE FLOW IS AT THE FORE-FRONT OF OUR MINDS

WE PROMOTE "PHYSICAL DISTANCING" VS. "SOCIAL DISTANCING" AND OUR WAYS OF OPERATING SHOULD PROVE THIS. AFTER ALL, OUR NEW WAY OF LIFE IN THIS INDUSTRY IS TO FIND WAYS TO BE "SOCIAL" AND GATHER, WHILE PHYSICALLY RESPECTING DISTANCE FOR EVERYONE'S WELL-BEING

OUR EMPLOYEES ARE JUST AS EXCITED TO SOCIALIZE AS YOU ARE! EXPECT TO RECEIVE POSITIVE, FRIENDLY AND INFORMATIVE INTERACTIONS

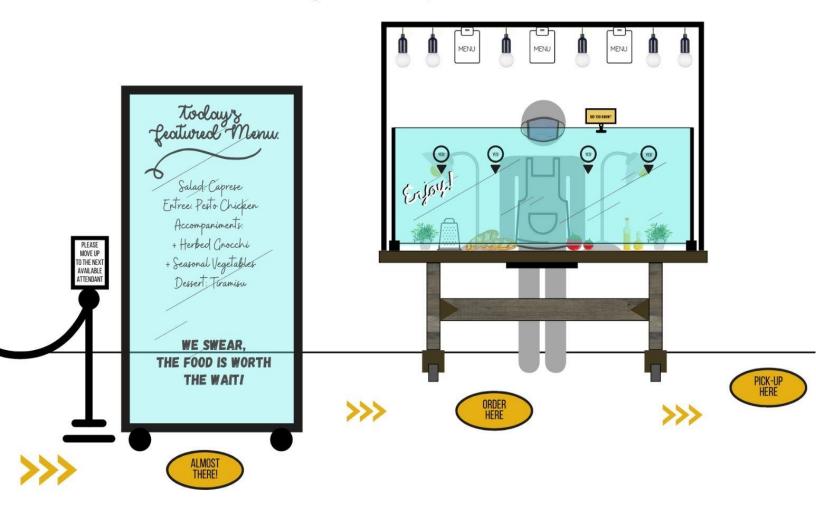

A PRE-PACKAGED MEAL SHOULD BE NO DIFFERENT IN LEVEL OF EXPECTATION THAN A SERVED HOT MEAL. ALL SERVICE SCENARIOS WILL BE MADE WITH CARE, LOVE AND CREATIVITY

ENHANCED SERVICES

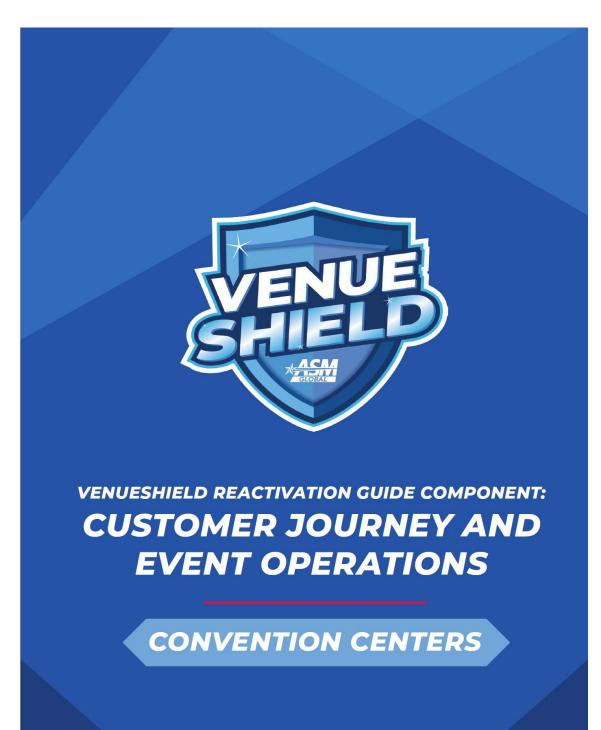

MODIFICATIONS TO SERVICE-STYLES AND CATERING EVENT EXECUTION MAY STILL BE IMPLEMENTED UPON CLIENT'S REQUEST.

PLEASE CONNECT WITH A CATERING SALES MANAGER TO DISCUSS AVAILABLE OPTIONS.

With our strengthened adaptability, we will continue to offer supplemental items such as sanitation stations, breath barriers and directional signage as add-on services. We want to ensure the comfortability of both our client's and attendees as we get back to in-person events!

CUSTOMER JOURNEY

CUSTOMER JOURNEY

The heart of the Greater Columbus Convention Center reactivation plan is focused on the customers who use the facility every day.

Provided in this plan are options for clients and examples of reduced capacities in meeting spaces. Example drawings show meeting room drawings for various functions. This information is meant to serve as a kickoff point for conversations between clients and their Event Manager.

- As food is an integral part of any convention or tradeshow experience, We have three customers for every event we manage: the show organizer, the exhibitor, and the attendee
- The life cycle of an event falls into three phases: the move-in, the hours the event is open to attendees, and the move-out
- Outlined below is the journey all customers will take to use our facilities. It begins at arrival to the center by either car, bus, cab, or rideshare and follows the journey to the two major assets a convention center provides: exhibition halls and meeting rooms
- Recognizing the need to reinforce physical distancing and proper safety protocols this plan outlines a series of recommendations for the use of these spaces
- · We describe how catering and retail food outlets will operate

ARRIVAL & DEPARTURE

PARKING

- Encourage Cashless/Touch-less Payments
- Recommend Using Pre-Paid Parking Ticket Option
 - https://parking.columbusconventions.com/Onlinetickets/index.aspx
- Use EPA registered cleaners and disinfectants
- Maintain Safety Data Sheets for all products and follow the manufacturer's directions on the label
- Track cleaning efforts with appropriate documentation
- Enforce proper use of Personal Protective Equipment (PPE) as recommended by the CDC
- Clean dirty surfaces (especially hard, non-porous) with detergent or soap and water prior to disinfection
- Remove visible contamination prior to cleaning
- Frequently clean electronics, including tablets, keyboards, remote controls and ticket machines. If manufacturer's instructions are not available, use alcohol-based disinfectants for touch screens

1.0 Arrival & Departure

2.0 Public Circulation

> 3.0 Vieeting Rooms & Ballrooms

4.0 Exhibit Halls

ARRIVAL & DEPARTURE

ATTENDEE ARRIVAL

- Doors open at peak times so people don't have to touch them
- Drop off areas stationed sufficiently apart to allow for crowd distribution
- · Floor graphics will be applied indicating safe distancing
- Staggering of opening times for all sessions and exhibit halls to allow attendees to arrive in smaller groups while maintaining proper physical distance

REGISTRATION AREAS

- Recommend non-interface/touchless registration
- Highly encourage print-at-home or scan with phone/digital while staggering in person registration times
- Add plexiglass shields to all counters, on front and sides, to guard human interaction, especially at registration, information counters, show management offices, etc.
- Space counters so there is one counter (6') of blank space between. No more than one registration worker per counter

BADGES

• Mail badges prior to show start

SIX FEET

Recommend pre-printed badges and no badge collection

SPACING

• Provide footprint floor applications 6 feet and increase queue line length with markings for spacing

SELF-REGISTRATION LOCATIONS

Provide wipe dispensers so attendee can wipe before or after use

1.0 Arrival & Departure

2.0 Public Circulation

3.0 Meeting Rooms & Ballrooms

> **4.0** Exhibit Halls

5.0 Concession & Catering

-SIX FEET

SAMPLE REGISTRATION DESK

SIX FEET

-SIX FEET

PUBLIC CIRCULATION

COMMON AREAS & CONCOURSES

- Adhere to density and attendance protocols
- Aisles should be directional and use arrows and wayfinding with physical distancing reminders
- Encourage color-coded badges to scheduled times that attendees can only visit certain parts of the hall to distribute crowds.
 For example:
 - 8am to 10am (Aisles 100-500 Blue badges, Aisles 600-1000 Red badges; Aisles 1100-1500 Green badges)
 - Then rotate all badge colors through all the aisles until each color has had a chance to visit each aisle

PUBLIC RESTROOMS

- Non-essential restrooms will be closed during move-in and out days, to maintain and focus on the highest foot traffic restrooms
- Stagger full restroom closures on event days (30 minute maximum) for a thorough cleaning midway through the day
- Overnight deep cleaning of all restrooms

VERTICAL TRANSPORT – PASSENGER ELEVATORS

- Installation of hand sanitizer units inside each elevator car
- Install graphics in all elevator cars to promote physical distancing

VERTICAL TRANSPORT – ESCALATORS

- Position hand sanitizer units near each bank of escalators
- Run escalator units (to include changing direction) throughout the day based on traffic flow to encourage physical distancing

ADA ACCOMMODATIONS

- Continue to maintain access in all ingress and egress plans into and around the facility
- Reduced capacity in room sets will still offer enough accessible seating, including companion seats, to comply with disability laws

1.0 Arrival & Departure

2.0 Public Circulation

> **3.0** Meeting Rooms & Ballrooms

4.0 Exhibit Halls

PUBLIC CIRCULATION

HANDLING A GUEST WHO BECOMES ILL WHILE IN GREATER COLUMBUS CONVENTION CENTER

If a guest visits First Aid and presents in a manner that could be COVID related they will be escorted to a dedicated meeting room to isolate and plan for transportation or admission to a

•

hospital as appropriate.

- As an additional measure, show managers could add a dedicated COVID specific First Aid provider on event days to take care of ill guests; remaining providers to address other first aid needs.
- On active event days, add additional holding rooms if demand becomes necessary.

1.0 Arrival & Departure

2.0 Public Circulation

3.0 Meeting Rooms & Ballrooms

4.0 Exhibit Halls

CAPACITY

- Reduce capacity per room to adhere to distancing guidelines
- Reconfigure our typical setups to new parameters around meeting space that allows for interactions with physical distancing

LAYOUTS

- Space furniture according to distancing guidelines
- Meeting room chairs will need to be set at 6' distance
- Theaters designed with 6' spacing

ATTENDEE FLOW

- Create entrance doors and exit doors into each room
- Ask clients to stagger start/end times in banks of rooms
- Provide ample time between sessions to allow for cleaning rooms (more than standard 15 minutes)
- Wipe down microphones, door handles, garbage cans, and straighten chairs to maintain 6' distancing

SHOW MANAGEMENT OFFICES & BOOTHS

- Restricted access to the interior of the office with an outside station in a ticket booth approach outfitted with plexiglass and protection
- Reconfigured offices/booths to minimize number of people being served personally
- Suggest that more information for membership renewals, ordering, association content or other items can be facilitated on personal devices

1.0 Arrival & Departure

2.0 Public Circulation

3.0 Meeting Rooms & Ballrooms

4.0 Exhibit Halls

THEATER LAYOUT SAMPLE

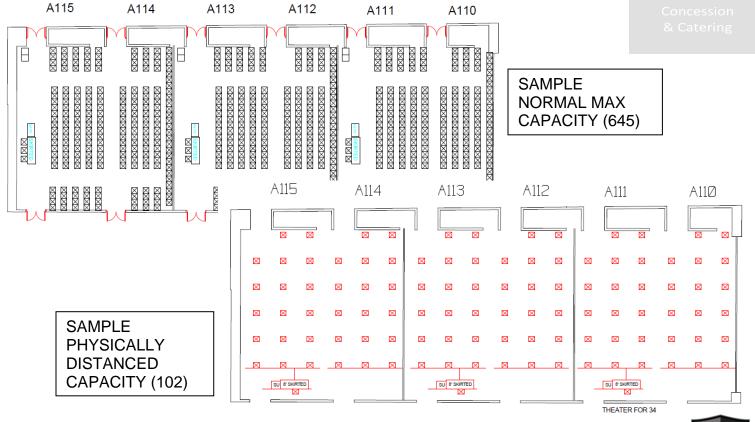

STANDARD MEETING ROOM SETUP

- Minimum 4' aisles between rows and around the perimeter
- Up to 14 chairs ganged together (each chair width is 20")
- 3'6 spacing between rows

PHYSICALLY DISTANCED MEETING ROOM SETUP

- Minimum 6' aisles between each row and around the perimeter
- No chairs gangedtogether
- 6' spacing between chairs

EXHIBIT HALLS

CAPACITY

- Limiting attendee flow per hour or per 4-hour segment would allow scheduled visiting times to the show floor
- Segment the show days to 3 segments per day (ie: Attendee segment one: 7am-11am)
- Manage amount of attendees and exhibitors in exhibit hall/specific areas with counting and controlled entrance area
- Congestion signage to indicate when an aisle or area is too crowded
- Staggered entrance times and entrance locations based on company and showzoning
- Encourage appointments with exhibitors to manage timing and flow more effectively

LAYOUTS

- For smaller booths make sure that there is a 1' "buffer zone" in the front of the booth for attendees to step out of the aisle to reduce congestion
- Place dividers in middle of 20', 15' or 12' aisles to manage traffic flow and attendee intermingling
- Wider Aisles 10' Minimum; Wider Cross-Aisles
- · Buffer spaces in between booths

1.0 Arrival & Departure

2.0 Public Circulation

3.0 Meeting Rooms & Ballrooms

4.0 Exhibit Halls

EXHIBIT HALLS

ATTENDEE FLOW

- A queue line to enter exhibit hall with pre-defined or controlled path
- Entrance units to include graphics on COVID-19 safety standards with possible speaking reel to remind attendees of regulations, similar to the airports, "Stand behind the Yellow Line"
- One Direction/One-Way aisles for Entry and Exit only have exhibitors on one side of aisle to limit congestion
- Alternate carpet color and visual signage

CONTRACTORS

- Labor Check in stations with 6' queue separations and floor markings
- PPE (gloves, masks, sanitizers readily available) protocols
- · Implement health/security ambassadors on all shows
- Tailgate talk information each morning about distancing when working in booths and working with exhibitors
- Safety: Instruction on proper use of masks
- Encourage team to wear a lanyard with hand sanitizer attached
- · Limit number of workers riding in a cart, no sitting side-by-side
- Space out labor sign-in locations to assure it is distanced

1.0 Arrival & Departure

2.0 Public Circulation

3.0 Meeting Rooms & Ballrooms

4.0 Exhibit Halls

EXHIBIT HALLS

MATERIAL HANDLING

- Wipe down of equipment prior to use
- Equipment assigned and not shared throughout a shift (i.e. forklift)
- Industrial spray down of all furniture with tags indicating when it was last sanitized with the date and hour
- · Spray down of all carpets when installed
- Move-in will require heavy targeting with exhibitors completing set and leaving to allow others to enter
- · All drivers must stay in their vehicles at delivery

EXHIBIT BOOTH RECOMMENDATIONS:

- 8' high pipe and drape
- Create guidelines for all exhibitor interactions (i.e. no hand shaking)
- No giveaways or booth snacks
- · Appointments or blocks of time assigned by attendee
- · No performances or live demos that gather crowds
- Strict booth staff limit per net square foot
- Rental hand sanitizer units available for exhibitors to place next to any hands-on contact location
- Provide simple peel and stick floor decals for exhibitors to apply in their booth space in front of counters or demo locations to suggest proper distance for attendees to stand
- · Nightly disinfecting via general spray of all exhibit areas

VenueShield provides guidance on all aspects of the customer journey including accommodating individuals with disabilities:

03 / Customer Journey

3.5 Disability Accommodations

Changes in procedures and protocols at venues may have unintended consequences for those with disabilities. For example, deaf guests who read lips may require screening from a worker wearing a clear face covering, so that the guest can see the employee's mouth. To remain compliant with applicable laws and provide reasonably accessible events for all guests, it is recommended that venues consult with a local advocate group for persons with disabilities. The following presents some considerations related to disability accommodations.

Venue access considerations. The adjustment to venue access may result in changes to disability accommodations. General items to consider while making access changes include:

- Venues that reduce points of ingress or egress must ensure continued accessibility
- Venues that temporarily reduce capacity should confirm that they still offer enough accessible seating, including companion seats, to comply with disability laws
- Long entry queues may be especially difficult for guests whose disability makes them unable to wait in a long line; venues may need to provide an expedited access procedure for certain guests.

Training considerations. During venue staff training, disability accommodations should be covered to ensure all staff members understand how new operating procedures may affect disability accommodations.

Venue support considerations. Some practices provided in support of disabled guests in the past should be modified during the COVID-19 pandemic..

- As a general rule, employees should avoid physically assisting/lifting guests. If a guest needs assistance, ask another family member to help.
- Assisted Listening Devices should be individually packaged for single use by a guest
- Venue-provided wheelchairs should be disinfected
 after every use

26 // ASM Global - VenueShield

3.6 Guest Departure

Venues should consider the following best practices for egress from the venue and for guest departure from the parking area, whether by personal vehicle, public transport, or by foot. Managing guest departure from the venue can be conducted without staging (see Section 3.6.1) or with staged exiting (see Section 3.6.2). Regardless of which exiting procedure is used, the venue will need to consider procedures related to departure by public transport, temporary exit and return, and emergency exiting.

3.6.1 Non-Staged Exit and Departure

If staged exit and departure procedures are not implemented, venues should follow normal exit plans and encourage guest to social distance as they leave the facility.

3.6.2 Staged Exit and Departure

After events that have a definite end—such as meetings, concerts, or sporting events—the venue should consider adopting staged venue exiting and departure. In this case, guests would be called zone by zone or released row by row when it is their turn to depart.

Workers and volunteers must understand the procedure and help guests comply with social distancing requirements until guests are in their vehicles or otherwise outside the venue doors. The effective use of staged exiting is reliant on clearly communicating the departure plan to all guests. Messaging of the departure plan can be accomplished using onsite signage, the public address system, event audio-visual equipment, and digital assets such as video boards and facility apps.

Some additional considerations related to staged exit and departure are:

- Determine the location of pinch points on concourses and avoid or eliminate them in order to facilitate guest movements
- Use a public announcement system to discourage guests from congregating in the lobby after the event
- If your facility design permits, consider zoning concourses for exiting to evenly distribute crowd flow. Note that zoning requirements will likely be different for different event configurations

CATERING & RETAIL FOOD OUTLETS

CATERING & RETAIL SERVICE AREAS

- Limit number of guests in a room according to building policy
- Physical distancing on seating and waiting lines / egress & ingress to event spaces, mark on floor where practical
- Hand sanitizers or sanitizer touch pads at entrance and around service areas

F&B SERVICE CONTINUES TO ENSURE

- Human contact points are minimized
- No shared use of utensils, food, beverages, condiments, etc.
- Only individual servings, plated with lids or boxed or action stations with sneeze guards and attendants
- Individual bottled/canned beverages
- No loose cutlery, use banquet cutlery rollups or airline packs

WORKFORCE

- The most important asset for the Greater Columbus Convention Center are the people who work here every day
- Producing some of the largest events in the region requires a highly trained venue staff, partner staff and skilled labor staff
- This section of the plan outlines how employees will return to work and how they will be protected
- Procedures for third-party employees to access the facility

FOLLOWING BEST PRACTICES

Greater Columbus Convention Center/ASM Global is closely monitoring government policy changes from WHO, CDC, IDPH, CDPH guidelines, government mandates, and public health advancements and will continue to make changes as necessary or appropriate to our protocols and procedures. If there is variation in recommendations, Greater Columbus Convention Center will follow the most conservative approach.

WORKPLACE TOOLKIT

TABLE OF CONTENTS

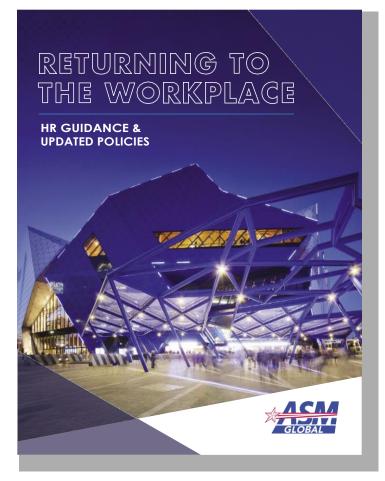

- 1. Return to the Workplace: HR Guidance & Updated Policies
- 2. Return to the Workplace: VenueShield Update Bulletin
- 3. Employee Questionnaire
- 4. Elevator Etiquette
- 5. Protect Yourself & Coworkers from COVID-19

RETURNING OUR WORKFORCE

- Phased re-introduction of team members
- New policies and procedures around bringing team members back to work:
 - Temporary flexible
 work arrangements
 - Work from home
 - Flexible work hours
 - Considerations around at-risk team members
 - Modified time-off policies:
 - Personal Leave of Absence Policy
 - Temporary Relaxed Attendance Policy

ASM GLOBAL COMPANY POLICY RECOMMENDATIONS

EXPOSURE POLICY

With CDC Guidance in mind, Greater Columbus Convention Center/ASM Global currently adheres to the following procedures for COVID-19exposure

SCENARIO A: Team Member with Direct Exposure to Confirmed COVID-19 Case

Team Member reports direct exposure to a confirmed case of COVID-19:

- Team Member should be advised that they should stay home and selfquarantine for a minimum of 14 days.
- The local HR Business Partner (HRBP) and General Manager should be notified. HRBP should immediately notify ASM Global's Corporate Human Resources Department.
- Team Member should be advised that they need to notify the HRBP if they become symptomatic and should seek immediate medical treatment.

If the Team Member becomes symptomatic but DOES NOT get tested or they DO get tested and the <u>results</u> <u>are negative</u>, they need to immediately notify the HRBP.

- The employee cannot return to work until the 14-day quarantine period has exhausted
- AND

ALL ONSITE CASES INVOLVE CONTACT TRACING & SANITIZING THE WORKSPACE

SHEEP

 They have had no fever for at least 72 hours (that is three full days of no fever) without the use of medicine that reduces fevers

AND

 Other symptoms have improved (for example, when their cough or shortness of breath have improved)

AND

 At least 10 days have passed since their symptoms first appeared

If the Team Member becomes symptomatic and they DO get tested and the <u>results are positive</u> they need to immediately notify the local HRBP.

- The employee initiates a new 14day quarantine based on the positive test result.
- The employee cannot return to work until all criteria described above are met.

Page | 55

EXPOSURE POLICY

SCENARIO B: Team Member with Potential Exposure to a COVID-19 Case

Team Member reports exposure to an unconfirmed case of COVID-19:

- Team Member should be advised that they should stay home.
- The local HRBP and General Manager should be notified. HRBP should immediately notify ASM Global's Corporate Human Resources Department.
- Ask Team Member to self-quarantine until test results are received on the un-confirmed case.
- If the unconfirmed case tests positive, follow SCENARIO A guidelines.
- If the unconfirmed case tests negative, Team Member may be placed back on work schedule.

SCENARIO C: Team Member with a Confirmed Diagnosis of COVID-19

Team Member reports diagnosis of COVID-19:

- Team Member should be advised that they should stay home and seek medical treatment
- The local HR Business Partner (HRBP) and General Manager should be notified. HRBP should immediately notify ASM Global's Corporate Human Resources Department.
- Team Member must immediately notify local Human Resources and the employee cannot return to work until the 14-day quarantine period has exhausted

AND

• They have had no fever for at least 72 hours (that is three full days of no fever) without the use of medicine that reduces fevers

AND

• Other symptoms have improved (for example, when their cough or shortness of breath have improved)

AND

• At least 10 days have passed since their symptoms first appeared

RESTRICTED SITE ACCESS AND STAY-AT-HOME ORDERS

IN THE EVENT GCCC IS UNDER A HEALTH DEPARTMENT ISSUED STAY-AT-HOME ORDER, ONLY ESSENTIAL STAFF WILL BE PERMITTED TO BE ON SITE

- Greater Columbus Convention Center/ASM Global requires all employees to self-monitor for symptoms and confirm that they have been symptom free for 72-hours prior to entering the workspace or starting their shift.
- Administration offices and facility access are restricted to only employees with official business and they can only enter through designated entrances after a disclosure of any symptoms.

PHYSICAL AREAS

Note: Public safety codes, building codes, applicable laws and security requirements must not be compromised to reduce the potential for physical contact with items in the workplace.

RECEPTION & COMMON AREAS

- Control building ingress and egress to promote ongoing safety and precautionary measures at those points.
- · Training reception personnel on safe interactions with guests
- Registration of all guests
- · Maintaining physical distancing
- · Re-arrange furniture to promote physical distancing
- Hand sanitizer in elevator lobbies and all other building common and high traffic areas

SIGNAGE

- Install signage at multiple, relevant locations in the entry sequence
- Explain building access rules and other protocols that impact how occupants use and move throughout the building.
- Wayfinding signage or floor markings to direct foot traffic and ensure safe physical distancing

PPE & CLEANING:

- Providing face coverings for all employees
- Monitor and review of existing cleaning guidelines and adjust or enhance as needed for cleaning paths of travel and high touch areas

SHIPPING AND RECEIVING AREAS

- Routing instructions and plans to avoid deliveries through employee or main entrance and instead route through areas that will minimize contact
- Separating shipping and receiving areas from the general population
- · Sanitizing the exterior of packaging if appropriate

ELEVATORS / ESCALATORS

- Physical distancing queue management for waiting elevator passengers
- Signage inside elevator cars displaying healthy elevator use protocols - this may include floor stickers to establish distancing zones and describe where and how to stand
- Review of elevator cleaning processes, and updates to ensure on-going cleaning of high touch surfaces like elevator panels and buttons

FREQUENTLY TOUCHED SURFACES

Frequently touched surfaces are reservoirs for viral pathogens. By reducing the frequency of physical contact with items in the workplace that are also touched by others, individuals can reduce their exposure to communicable diseases.

In addition to providing disinfectant sprays or wipes adjacent to each touchpoint, Greater Columbus Convention Center will implement the following to reduce touchpoints, when possible:

LIGHT/POWER SWITCHES:

- Affix signage to remind occupants to keep switches on all day
- Provide wall-mounted disinfectant dispensers

DOORS:

Affix doors in an open position
 where possible

FREQUENTLY TOUCHED SURFACES CONTINUED

COLLABORATION TOOLS:

- Removal of shared conference phones to encourage the use of personal mobile phones or laptop softphones for teleconferences
- Removal of whiteboard pens and erasers to encourage individuals to bring and manage their own
- Providing whiteboard cleaning solution and disposable wipes adjacent to every board

CHAIRS:

- Remove unnecessary fabric upholstered chairs
- Affix notices to each chair reminding occupants to avoid or disinfect touchpoints

SHARED EQUIPMENT:

• Reduce the quantity of printers and copiers to dissuade printing

SUPPLIES STORAGE:

- Secure supplies storage and designate specific personnel to manage stock and distribute items
- Add places for individuals to store and secure their own items separately from others (i.e., individual coat hooks rather than coat closets used by the group)

INSIDE THE WORKPLACE

Encourage good personal hygiene and infection control practices when team members are in the workplace, including:

RESPIRATORY ETIQUETTE

 Encourage the covering coughs and sneezes into a tissue and immediately throwing tissue away

• Turn away from others when coughing or sneezing

USE HAND SANITIZER

HAND HYGIENE

- Promote frequent and thorough hand washing
- Make hand sanitizers available in multiple locations adjacent

to common touch- points including break rooms, copier areas, etc.

AVOID TOUCHPOINTS

- Provide disposable wipes so that common touchpoints (e.g., doorknobs, light switches, desks, desktop peripherals, remote controls, and more) can be disinfected by employees before each use
- Discourage the use or borrowing of other people's phones, desks, offices or equipment
- Maintaining a clean workplace will assist in minimizing risk to employees

KITCHEN AREAS

- Develop new practices on kitchen and meal preparation areas, which may include some temporary measures such as:
 - Encourage staff to bring food and beverage items from home and manage them individually
 - Minimize touchpoints by removing coffee pots and the like, eliminate open food items
 - Increase frequency of cleaning appliances such as refrigerators and microwaves

INSIDE THE WORKPLACE CONTINUED

INDIVIDUAL DESKS

- Implement a strict clean-desk policy so that non-essential items are not stored on the desk, but rather enclosed in cabinets or drawers
- If desks or work areas are shared, advise individuals to sanitize all surfaces upon arrival at that seat. Supply disinfectants in the immediate proximity (or on each desk)
- Unless stringent cleaning protocols are enforced, and if possible, avoid sharing of desks
- Staggering schedules to avoid shared workspace

IN-PERSON MEETINGS

- Coach team members to critically evaluate the requirement for in-person meetings
- Limit the number of attendees at in-person meetings and limit to spaces that accommodate safe distances
- Host large team/staff meetings via video conference rather than in-person
- · Eliminate in-person meetings with external guests

PRE-SHIFT BRIEFING

- Where possible, pre-shift briefings should be conducted in rooms large enough to accomplish physical distancing
- Eliminate or suspension of face-to-face shift changes

EMPLOYEE CHECK-IN

BUILDING ENTRY AND EXIT PROCEDURES

Maintain 6' physical distancing at employee entrances

All employees must pass a daily temperature check and a health questionnaire screening to be eligible to work

06/ Work Space Safety Related to COVID-19

WORK SPACE SAFETY RELATED TO COVID-19

The best practices in this section are actions that should be taken by venues to complement the changes in protocols described in Section 5 to support worker safety. In all cases, public safety codes, building codes, applicable laws, and security requirements must not be compromised by actions taken to reduce the potential for physical contact with items in the workplace.

6.1 Evaluate Reception and Common Area Spaces

The venue should evaluate reception and common areas to determine whether modifications are needed in support of worker safety. Review the Customer Journey and Event Operations component for work space considerations related to entrances/exits and controlling crowds in common areas. Related specifically to eventday staff, venues should evaluate whether furniture may need to be rearranged to promote social distancing between staff and guests in reception areas and other common areas.

6.2 Evaluate Break Room Spaces

Break areas are high touch and high-use areas for workers and require careful evaluation to ensure that they allow and promote social distancing expectations of staff. Actions the venue may need to take to provide for and support social distancing in the break room include:

- Calculate the number of optimal allowable seats in each break room considering 6-foot (2 meter) social distance guidelines
 - o Limit the number of chairs, or space chairs appropriately, for the space capacity

// ASM Global - VenueShield

14

- Post the capacity of each break room or area and use signage to ask that staff not reposition chairs or tables
- Use a break room set-up that consists of 5-foot rounds with a maximum capacity of three people per table. Alternatively, request that Team Members sit only on one side of each table
- Ensure that all break areas are thoroughly cleaned prior to every event and cleaned intermittently while in use, between staggered break periods, ideally every 30 minutes
- When meals are provided, provide prepackaged meals; do not provide buffet service
- Install a hand sanitizer station or hand washing station in each break area; post signs on all entrance /exit doors and within the room requesting that all staff wash or sanitize their hands both before and after meals

6.3 Ensure Adequate Cleaning Schedules Throughout Staff Areas

The venue should review all existing cleaning schedules for staff areas and work spaces. Adherence to the cleaning schedules should be monitored and adjusted or enhanced as needed, especially for common areas and areas with high-touch items.

Provide disinfecting supplies to all staff. To enhance on-going event-day disinfecting of high-touch items in the venue, provide staff with sprays or wipes to use as they perform their assigned activities on eventday. Such disinfecting activities should not replace regularly scheduled and dedicated cleaning that occurs at the venue.

WORKFORCE

GCCC RE-OPENING COMMITTEES

As the Greater Columbus Convention Center sought to reopen and reactivate the convention space, various committees were established composed of GCCC staff and in-house partners to ensure a successful and safe restart of our operation. Guidance to facilitate this process was gleaned from ASM Global corporate operations, in addition to direction from the state of Ohio.

The Greater Columbus Convention Center committees established were:

- Employee Health & Welfare
- Building Preparation & Readiness (all inclusive)
- Parking Facilities
- Administrative and Staff Offices
- Signage
- Facility Entrances
- Seating/Dining
- Fitness Center
- Break Rooms/Family Meal Room
- Deliveries/Loading Dock
- Point of Sales
- Customer/Guest Relations
- In-House Partner Integration
- Communications Strategy

TECHNOLOGY & EQUIPMENT

VENUESHIELD REACTIVATION GUIDE COMPONENT: TECHNOLOGY & EQUIPMENT CATALOG

As the Greater Columbus Convention Center continues to operate with physical distancing protocols, the need to provide additional technology and equipment to support virtual sessions will increase. GCCC's strategic partners are ready to assist with cutting edge solutions:

Smart City Networks is the exclusive Internet provider for GCCC and can handle everything from a 10 person meeting to 20,000 concurrent Wi-Fi users. Providing connectivity and legendary service to live stream events is Smart City's specialty.

<u>https://blog.smartcity.com/smart-city-networks/smart-city-network</u>

MillsJames is GCCC's Preferred In-House Production Partner and has an enormous amount of experience in video production, lighting, sound detailed sound mixing and mastering and stunning event audio visual services. Mills James has equipment on site to create a soundstage for hybrid, virtual and live streaming events.

https://www.millsjames.com/streaming-guide

Fern is GCCC's Preferred General Service Contractor and can provide creative solutions to physical distancing, registration, and event setup options. Fern also has also introduced Fern Health Check as an industry-leading solution to COVID testing and reporting.

Fern Health Check provides:

- A convenient self-assessment portal that allows individual control of health data through a HIPAA-compliant platform that can be shared via a personalized Health Passport
- Customizable policies based on organization, event and venue requirements
- Dashboard reporting for event organizers that can be grouped by stakeholder segments, such as event staff, attendees and exhibitors
- API Integration with industry registration and mobile app solutions
- FDA-authorized testing solutions, including at-home kits for pre-event and post-event use, as well as on-site rapid testing administered by licensed health professionals
- Deployment of evolving testing solutions to include "at-the-door rapid testing" upon FDA approval

http://proposal.fernexpo.com/preview/VS9VejhjY1RaM0drWDlzdFBkZzI2UT 09/pnnt8bbbbbc

Innovative Displays is GCCC's exclusive installer of wall and floor graphics. ID is also able to provide PPE solutions for events and organizations of all sizes.

Custom logoed masks and hand sanitizer units available for your event or business!

Technology is vetted and comprehensive guidance provided to ASM Global venues through VenueShield's Technology and Equipment Catalog. The VenueShield[™] Technology and Equipment catalog helps simplify established and emerging technology claims by providing crucial information:

technology and equipment catalog / 02

<u>TOC</u>

2.3 Safety and Sanitization

2.3.04 Cleaning & Disinfection Equipment | Electrostatic Sprayers

This equipment category includes cleaning and disinfecting equipment, including products that distribute disinfectants on surfaces (such as low pressure and electrostatic sprayers) and equipment that is used to disinfect germs (such as UV light and on-site hypochlorous acid generators).

Note: Devices and technologies that claim to sanitize or disinfect (e.g., disinfecting chemical products) are regulated in the U.S. by the U.S. Environmental Protection Agency (USEPA). Only equipment that is approved by USEPA and used in accordance with the manufacturer's requirements can be considered to be proved effective in deactivating viruses. However, the USEPA has not tested equipment directly against SAR-COV-2, so recommendations rely on testing on similar viruses in the past. In addition, the EPA does not regulate certain disinfection application equipment such as sprayers and pumps.

ByoPlanet MS-700 COMPACT SERIES

The MS-700 Series Electrostatic Spray System delivers disinfectants and sanitizers in an efficient, cost-effective way. The system uses 65% less solution, works up to 75% faster than traditional methods, and covers up to 18,000 square feet per hour 1.

- · Single line, two roller peristaltic pump 2mL/sec. (+/- 8%)
- Lightweight for everyday use
- · Handle mounted sprayer holster w/ drip cup (100mL capacity)
- ·1 Gallon/2 product carry capacity
- One color coded RDI bottling connection cap 1/8" ID Barb
- Optional upgrade for two gallon stainlees steel tank

Manufacturer: ByoPlanet Vendor(s): Byoplanet International R&D

Availibility: SA, NA

https://byoplanet.com/byoplanet-ms-700-electrostatic-model.html

Clorox 360 Disinfecting Machines

Keep your facility healthier while saving time, money and labor. The innovative electrostatic sprayer, with the patented PowerWrap[™] nozzle, delivers trusted Clorox solutions to the front, back and sides of surfaces. Superior coverage for better germ protection. Eligible for use against SARS-CoV-2, the virus that causes COVID-19, based on the EPA's Emerging Viral Pathogen Policy.

Manufacturer: CloroxPro Vendor(s): Decon Seven

Availibility: NA VenueShield Trusted

New and improved ways to promote touchless technologies for events will become the new normal

TECHNOLOGY CAPABILITIES

- Greater Columbus Convention Center is positioned to support greater than usual bandwidth needs that may arise from show-side requirements to offer additional virtual options
- We can support additional overflow requirements to easily connect multiple rooms due to physical distancing in meeting rooms
- Support of virtual events if there is a call for presenters/performers to be on site but to be onstage in front of an exclusively or primarilyvirtual audience, our internet circuits would again be very able to support these needs from a data and connectivity perspective
- The ability to deploy more access points to accommodate physical distancing

PHYSICAL EQUIPMENT

TECHNOLOGY GAINING POPULARITY

Examples of technology that Greater Columbus Convention Center is monitoring for future practical application within the facility:

Robotics to reduce cost and lower social interaction

UV-C Light Disinfection for hightouch areas

Touchless Technologies to reduce hightouch surfaces

Space Utilization Sensors to avoid unnecessary service delivery

PUBLIC AWARENESS

VENUESHIELD REACTIVATION GUIDE COMPONENT: **PUBLIC AWARENESS**

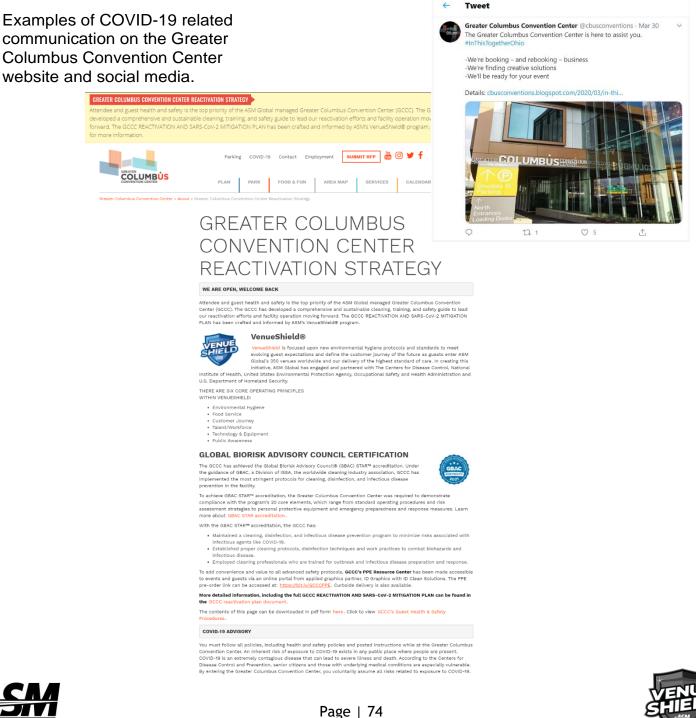

PUBLIC AWARENESS

An effective communication strategy must include methods to communicate information to our customers before, during, and after an event.

- Increased messaging through websites and social media will be necessary
- On site messaging through signage and digital will be required to reinforce physical distancing and promote proper hygiene
- An effective ongoing public awareness plan will instill confidence that Greater Columbus Convention Center is a safe place to do business

VenueShield[™] provides detailed communication strategies for venues to implement prior to the reopening process and during events to promote new policies and reinforce safe behaviors and preparedness:

Implement Public Awareness Plan / 03

The following checklist, with proposed timeline, can be used to guide an implementation schedule for public awareness activities.

Strategy Type	Timeline	Action Items
Early Awareness	As soon as	Identify stakeholders
	possible	Appoint a venue Communications Officer
		 Prepare venue-specific Public Awareness Plan that includes detailed communication plans and methods of outreach
		 Request press release from ASM Global to share with key stakeholders as appropriate
	 Prepare a local venue-specific summary document to share with key stakeholders to promote confidence in ASM Global's ability to safely reactivate the venue 	
	Begin education and training for all internal stakeholders	
		 Begin preparing items for subsequent checklist steps: graphics, videos interview requests and scheduling, signage
Reactivation	Two weeks before	 Send out venue-specific press release using the provided template press release tailored to fit the venue
	reopening	 Consider creating a media day for local media to visit the venue to see the work that has been done to prepare for reopening and ask questions
		 Update the venue website and include a landing page that outlines guest policy information and details VenueShield preparedness information
Opening	One week before event	 Use the Customer Relationship Management (CRM) system to send emails to guests that will be attending the event to explain current venue policies
		 Use social media to distribute videos and messaging, inviting guests back into the venue
		Push out a new graphic or video to social media each day
		 Continue to use radio and television to provide messaging about the reopening of the venue
		Use local television networks to inform guests of new event protocols that they should be aware of before attending an event
Day of Event	During the event	 Post signage that is consistent in look and style with both the broad and specific messaging for the event; signage should convey venue policy and expectations, and be positive, practical, and proportionate
		 Use audio and video boards to remind guests of new policies and procedures
		 Continue to post on digital and social media outlets to keep public informed and updated
		 Use event-day signage, digital outlets, and social media posts to inform guests of prohibited items and new policies

PUBLIC AWARENESS

SAMPLE MESSAGING

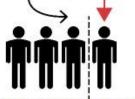

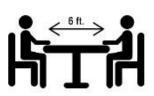

Social distancing is the practice of reducing close contact between people to slow the spread of infections or diseases. Social distancing measures include limiting large groups of people coming together, close buildings and cancelling events.

Ask these questions:

- 1. What conditions support social distancing in offices, café/restaurants & retail?
- 2. What behaviors can you encourage to reduce close personal contact?
 - 3. How can you help slow the spread of respiratory infections?

Conditions that can support social distancing in offices, cafes, restaurants and retail outlets

Reduce number of people Staggered breaks, work days and start times
Space seats 6 feet apart Remove furniture if needed

Alternative service type Grab & Go, Takeaway, Drop off service

Reduce total transaction time Use card payment/contactless

Slow the spread of respiratory infections. Promote;

Good hand hygiene

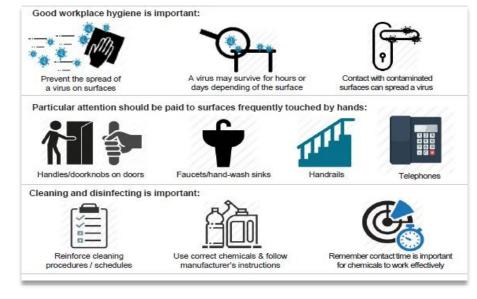

Good respiratory hygiene

Effective home / workplace hygiene

Cancel nonessential visits or appointments, reschedule it.

FROM COVID-19

• STAY HOME IF YOU ARE SICK WITH A COUGH OR FEVER SYMPTOMS

• STAY 6 FEET AWAY FROM OTHER CUSTOMERS AND STAFF AS MUCH AS POSSIBLE

• USE A FACE COVERING WHILE YOU ARE HERE

• WASH YOUR HANDS WITH SOAP OR SANITIZE YOUR HANDS AFTER CONTACT WITH FREQUENTLY TOUCHED SURFACES

Thank you for your participation in helping our Community combat the spread of COVID-19.

CONCLUSION

The overall goal of this plan is to demonstrate to employees and customers that attending events, conventions and meetings can be accomplished responsibly and ultimately GCCC hopes to continue to earn your trust through our actions.

The goal is achieved by enhanced cleaning protocols, new ways of providing food service, understanding the customer journey, promoting physical distancing, safely returning our employees to work, embracing new forms of technology to enhance the experience, and explaining what we are doing and why.

We miss our clients, events, and partners and can't wait to see everyone at an event soon! Please view our video love letter to you below:
